👤 About myself

I am Preetam Kumar Ghosh, an undergraduate student pursuing a Bachelor of Science in Electrical and Electronic Engineering (EEE) at Khulna University of Engineering & Technology (KUET), Bangladesh. I am passionate about bridging core electrical engineering concepts with modern technologies such as Machine Learning, Artificial Intelligence, and Photonics.

Alongside my academic studies, I am actively developing my skills in programming and problem-solving, particularly in C and C++, with a growing focus on data structures and algorithmic thinking. I am also building a strong foundation in machine learning, including probability, statistics, and optimization techniques such as gradient descent.

My current interest lies in integrating machine learning with electronics, automation systems, and photonics-based applications. I aim to explore real-world engineering problems by combining AI techniques with circuit design, embedded systems, and electrical systems to develop intelligent and efficient solutions.

In my free time, I enjoy reading books, playing guitar, singing, listening to music, and exploring movies, anime, and series.

🎵 Hobbies and Interests

Singing

I love music—singing and playing guitar. Not a pro guitarist but trying to enhance my skill.

Reading Books

I enjoy reading novels and short stories, especially Bengali literature.

I admire works by Rabindranath Tagore, Sarat Chandra, Bibhutibhushan, Shirshendu Mukhopaddhay, Humayun Ahmed etc.

Others

I enjoy watching anime, movies—especially horror—and various series.

Lately, I've been mostly watching anime, and I also read manga and manhwa. I am currently more into gaining practical skills needed for real-life applications related to my field of study.
